Intelligence to Drive Progress
So you can focus on what matters most
LexisNexis TotalPatent One

A comprehensive patent search solution that is fast and easy to use. The all new interface delivers a more fluid, efficient user experience and is backed by best-in-class content. Stop searching and start finding the results you need.

LexisNexis PatentOptimizer

Quality and efficiency matter more today than ever before. Automate and streamline the process of creating high-quality patent applications and generating office action responses with PatentOptimizer.

LexisNexis PathWays

Leverage the power of big data to direct your application to the best path for success with comprehensive and reliable predictive analytics.

Legal Analytics by Lex Machina

Gain a competitive advantage with insights never before available about judges, lawyers, parties and the subjects of the cases themselves, culled from millions of pages of litigation information.

LexisNexis PatentAdvisor

The standard in patent analytics now enables you to easily, and with more accuracy than ever, predict an assigned examiner’s behavior and identify cases that require extra care and a carefully crafted prosecution strategy with the proprietary ETA metric.

LexisNexis PatentOptimizer for Litigators

The stakes in patent litigation are high. Shift the odds in your favor by drafting more effective claim construction arguments. Detect and analyze prosecution errors and locate § 112 anomalies with this analysis tool.

LexisNexis PAIR Watch

Easily monitor the prosecution status of one patent or 1,000 patents with fail-proof application monitoring. Receive automated email alerts regarding updates to the Bibliographic Data, Image File Wrapper, Continuity Data or Transaction History.

LexisNexis PatentSight

Gain insight from patent analytics for R&D strategy, benchmarking, portfolio management, licensing, mergers and acquisitions, and scouting for disruptive technologies. Delve into the strength, quality and value of patent portfolios and their fluctuations over time.
